## WEB DEVELOPMENT PROJECTS

**Grocery Guys** | <https://intense-chamber-80785.herokuapp.com/>

An application geared towards the Autism Community that allows the user to upload images and have them analyzed to return numerical data identifying the socially-perceived emotions found in the image. The user can also view previously analyzed images to use as a reference for future use. Tech used: Handlebars.js, JavaScript, Node.js, Express.js, MySQL, JAWS, Multiple API's & Passport.js.

github: <https://github.com/portercol/Grocery-Guys>

**Boredom Buster** | <https://tdmoore004.github.io/boredom-buster/>

Choose from 3 criteria that will populate a random activity to do. 5 related books are populated beneath the activity list. Adding the activity to a "to-do" list is also available. Technologies used: HTML, CSS, jQuery, Bored AP and Google Books API.

github: <https://github.com/portercol/boredom-buster>

**Devour The Burger** | <https://glacial-caverns-34503.herokuapp.com/>

A full-stack restaurant app that allows the user to input the names of burgers they'd like to eat. After adding the burger the user will see a list of burgers waiting to be devoured. After clicking devour, the user will see the list of burgers that have been devoured. Technologies used: Handlebars.js, jQuery/JavaScript, Node.js, Express.js, MySQL & homemade ORM.
